March 13, 2009

Alan Gardner, President
Eco Friendly Energy Company
215 Tiburon Court
Walnut Creek, CA 94597

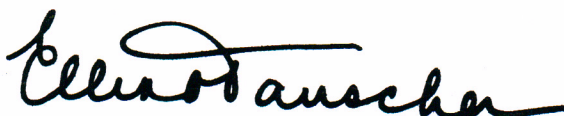

Dear Mr. Gardner,

I would like to extend my congratulations to you and the Eco Friendly Energy Company on your collaboration with the Pittsburg Unified School District (PUSD) to lead and commit to one of the largest K-12 solar installations in California, and the first completely solar-powered high school football stadium in the United States.

I understand that the construction of 15 solar sites for the PUSD is the ultimate example of a fusion of alternative energy and education. Your private and public partnership, will provide a reliable, affordable, and structurally beneficial source of energy for the next 25 years. The simultaneous offering of entire courses of study and classroom access to system data from the new solar installations showcases a true dedication to the students of California.

As the Congressional Representative for the 10th District of California, I know that our region is often on the national forefront of environmental and energy issues. In order to reduce our dependence on foreign oil and help fight climate change, I strongly support the use of renewable energy sources. As a mother, I understand the importance of a healthy environment's effects in maintaining a high quality educational system. Congratulations on this accomplishment, and I am proud to see this innovative pairing of energy and education.

Sincerely,

Ellen O. Tauscher
Member of Congress
